COMPLETE TEST SOLUTIONS FOR

Conducted Immunity Testing
Accredited Calibration

Quality at EMC PARTNER is based on an ISO 9001 management system. This is the foundation for an ISO/IEC 17025 accreditation verified by the Swiss Calibration Service (SCS). SCS No. 146 is the accreditation number of EMC PARTNER AG. Locally accredited but recognized worldwide through affiliation with the ILAC organisation.
Basic and product standards require a mix of conducted immunity EMC tests. Required test types can include:

- Electric Fast Transient (EFT)
- Surge (CWG, Ring wave, Telecom)
- Damped Oscillatory Wave (DOW)
- AC / DC Dips & Interrupts
- AC / Impulse / DOW magnetic field
- Common Mode
- Differential Mode

The ideal is a flexible test equipment that combines any or all of these requirements into one single solution.
CUSTOM IS STANDARD

IMU and DOW generators are designed with the user in mind. A modular architecture allows configuration of test circuits to meet any requirement. A solution that can easily be extended with more modules when additional tests are needed.
